Comment 1: Sanford extends much further south than the areas listed already. We need to address the issue regarding the safety and accessibility for pedestrians and bicycles in the area where the 17-92 meets Lake Mary Blvd. This is not a walking- or biking-friendly area and it makes it difficult for the many residents in south Sanford to get around this area and/or to get from where they live to the downtown Sanford area if they want to walk or bike. | By Bridget M
