ECONOMIC ENVIRONMENT

Resilient Uncertainty

In the second quarter of 2024, the economic landscape was marked by complexity as markets closely monitored potential interest rate cuts. The period balanced fears of economic overheating and optimism for a soft landing. The U.S. economy grew at a rate of 2.8% in the second quarter, according to the BEA advance estimate. This performance was driven by a strong labor market,

with the unemployment rate steady at 4.1% by the end of Q2. However, this strength raised inflation concerns, as core PCE inflation remained elevated at 2.4%, above the Federal Reserve's 2% target.

By the end of Q2, market expectations shifted towards a rate cut scenario, with futures markets pricing in 1-2 rate cuts by year-end. The commercial real estate sector faced increasing pressures, with office space vacancy rates reaching 18.2%, the highest level since 1993, highlighting challenges from remote work arrangements. Delinquency rates in auto loans rose to 2.8%, nearing pre-pandemic levels and suggesting potential stress in household finances. The June jobs report offered a mixed picture; while overall job growth remained positive with 215,000 new jobs added,

the pace of hiring slowed compared to the previous quarter. The labor force participation rate increased slightly to 62.8%.

Progress in disinflation continued, but at a slower pace than anticipated. Core CPI stood at 3.2% year-over-year in June, down from 3.8% at the start of the quarter, indicating that reaching the Fed's 2% inflation target would be a lengthy process. As the November elections approached, policy implications became more significant. Bipartisan support for tougher trade stances, especially towards China, emerged as a key theme. The U.S.-China trade deficit narrowed to \$268 billion in Q2, reflecting ongoing tensions and changing trade patterns.

The economic outlook for the rest of 2024 remains cautiously optimistic. While the risk of recession has decreased, challenges persist. Geopolitical tensions and potential policy shifts following the November elections could introduce new variables into the economic equation.

DOMESTIC EQUITIES

Tech Triumphs & Small Struggles

In the second quarter of 2024, the U.S. stock market exhibited steady growth, with the Russell 3000 Index recording a 3.2% increase. Large-cap stocks demonstrated significant strength, with the S&P 500 Index rising by 4.3%. In contrast, both mid-cap and small-cap stocks faced challenges, each declining by more than 3%, as indicated by the Russell Mid Cap and Russell 2000 Indices, respectively.

The technology sector continued its robust performance, surging

by 13.8% and achieving a remarkable 28.2% increase since the beginning of the year. This sector's growth was predominantly driven by AI-related companies, which have seen their earnings and valuation

multiples expand rapidly. Conversely, the real estate sector experienced a decline of 1.9%, continuing its trend of underperformance relative to the broader market, with a year-to-date decrease of 2.5%. This sector has been adversely affected by inflation concerns, refinancing risks, and lower valuations in private commercial office spaces.

In terms of investment styles, growth stocks maintained a competitive advantage over value stocks, although this disparity diminished across smaller market capitalizations. Notably, June saw Low-Volatility and High Dividend stocks emerge as the third strongest factors in the market, following Growth and Momentum, suggesting a potential recovery in some of the most impacted large value stocks.

Furthermore, valuation disparities across different market capitalization sizes have continued to widen. Large-cap stocks are now trading at approximately 22 times forward earnings, compared to 17 times for mid-cap stocks and 16 times for small-

cap stocks. This trend underscores the varying investor sentiment and economic expectations embedded within different segments of the market.

INTERNATIONAL EQUITIES

Currency Conundrums

International equities experienced modest growth in the second quarter, with the MSCI All Country World ex-US Index advancing by 1.2%, maintaining its upward trajectory.

Similarly, the MSCI EAFE Index, which represents international

developed markets, recorded a slight increase of 1.3% in local currency terms. However, the strength of the U.S. dollar presented a significant challenge, resulting in a marginal decline of -0.2% for the U.S. dollar-denominated

EAFE Index, translating to a 1.5% currency headwind.

This dynamic was particularly evident in Japan, one of the major countries within the EAFE Index. The Japanese equity market, as measured by the TOPIX Total Return, posted a gain of 1.7% in Japanese yen terms during the quarter. Nevertheless, due to the yen's continued depreciation, the return in foreign currency terms was negative. Moreover, within the index, the Far East and Pacific regions faced downturns, declining by -3.2% and -2.2%,

respectively. This was in contrast to the European region which rose by nearly 1.0%.

Emerging market equities outperformed their developed

counterparts, as indicated by the MSCI Emerging Markets Index. The index gained 5.1% in the quarter.

Easing concerns over U.S. interest rate hikes, influenced by softer U.S. macroeconomic data, along with a rebound in

China, bolstered returns in emerging markets. However, recent weaker economic indicators from China have tempered investor enthusiasm.

BOND MARKET

Treasury Tensions Persist

In the second quarter of 2024, the Bloomberg Aggregate Index saw a nominal gain of 0.1%, reflecting an overall flat performance. However, this figure belies the significant dispersion among the indices—and the underlying bonds—that constitute the broader market.

In the realm of government securities, a notable milestone was the continuation of the 2/10s Treasury Curve inversion, which extended beyond 700 days, setting a new historical record.

The Global Aggregate Index ultimately closed the quarter down by 1.1%, though performance was volatile throughout.

As yields continue at elevated levels and the trajectory of interest rates is expected to decline, market analysts currently recommend increasing allocations to high-quality fixed income assets. This sentiment, however, has fluctuated as the year has unfolded. This strategic positioning is aimed at anticipating potential market shifts and leveraging opportunities within the evolving economic landscape.

CASH EQUIVALENTS

No Guessing Here

The three-month T-Bill index returned 1.0% for the second quarter. Three-month treasury bills are now yielding 5.4%. The projected path of rates has a broad dispersion and is being widely debated. However, most market participants believe that the next move is likely down.

On June 30th, 2024, the Sanford Police Officers' Pension Fund's GW&K Small Cap Core portfolio was valued at \$3,120,455, a decrease of \$84,173 from the March ending value of \$3,204,628. Last quarter, the account recorded no net contributions or withdrawals, while recording a net investment loss for the quarter of \$84,173. Since there were no income receipts for the second quarter, net investment losses were the result of capital losses (realized and unrealized).

RELATIVE PERFORMANCE

During the second quarter, the GW&K Small Cap Core portfolio lost 2.4%, which was 0.9% better than the Russell 2000 Index's return of -3.3% and ranked in the 45th percentile of the Small Cap Core universe. Over the trailing year, the portfolio returned 8.2%, which was 1.9% below the benchmark's 10.1% performance, and ranked in the 71st percentile. Since March 2021, the account returned 1.1% per annum and ranked in the 63rd percentile. For comparison, the Russell 2000 returned an annualized -1.1% over the same time frame.

ANALYSIS

At quarter end, the GW&K Small Cap Core portfolio was invested in ten of the eleven sectors in our analysis. Relative to the Russell 2000 Index, the portfolio was overweight in the Consumer Discretionary, Health Care, and Materials sectors, while underweight in Energy, Financials, Real Estate, and Utilities. The Communication Services sector was left vacant, and the remaining sectors closely matched their index counterparts.

Selection effects were the primary cause of the portfolio's outperformance over the Russell 2000 Index last quarter. The main contributor to outperformance was the overweight Health Care sector, which accounted for about a fifth of total concentration and doubled the benchmark's gains. With the addition of wins in Consumer Discretionary and Materials, the portfolio managed to compensate for losses elsewhere and finished 90 basis points above its index counterpart.

SANFORD POLICE OFFICERS' PENSION FUND
FOREST INVESTMENT ASSOCIATES - GROWTH & VALUE PARTNERS, LP
PERFORMANCE REVIEW
JUNE 2024

INVESTMENT RETURN

This account was funded with an initial contribution of \$12,910 in September 2015. However, a material portion of the committed capital was not allocated until April 2016. Performance for those initial months, based on a relatively minor balance, would be non-meaningful to report, and could potentially distort cumulative returns going forward. For this reason, we have moved the performance start date to March 31, 2016. All data and effects from prior to that date are still captured and reflected in the composite portfolio.

On June 30th, 2024, the Sanford Police Officers' Pension Fund's Forest Investment Associates Growth & Value Partners, LP portfolio was valued at \$1,878,330, representing an increase of \$19,401 from the March quarter's ending value of \$1,858,929. Last quarter, the Fund posted withdrawals totaling \$3,771, which partially offset the portfolio's net investment return of \$23,172. Since there were no income receipts for the second quarter, the portfolio's net investment return figure was the product of net realized and unrealized capital gains totaling \$23,172.

RELATIVE PERFORMANCE

During the second quarter, the Forest Investment Associates Growth & Value Partners, LP account returned 1.2%, which was 0.5% below the NCREIF Timber Index's return of 1.7%. Over the trailing year, the portfolio returned 5.2%, which was 4.0% below the benchmark's 9.2% return. Since March 2016, the Forest Investment Associates Growth & Value Partners, LP portfolio returned 4.5% per annum, while the NCREIF Timber Index returned an annualized 5.6% over the same time frame.
